**DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE**

---

This 3 story 2 bay building is located in mid-block and has a flat roof. There is a first floor shop front and above it a metal sign, two stories in height at right angles to the building. The upper floors are surfaced in formstone.

There is a entrance recess to the left with a metal and glass panel door topped by a transom. Another entrance with 2 concrete stairs and a wood and glass door is to the right. Between them is the shop window which is formed of four vertical panes of glass. The three panes to the left are narrower than the front panel and form a faceted curve which becomes the right surface of the entrance recess.

The windows are all double hung 1-over-1 except for the 3rd floor left window which is 4-over-4. They are ornamented with formstone sills and voussoir and those on the 2nd floor are taller than the third floor ones.

There is a very deep wood cornice with extended scrolled end brackets, small brackets between them and two rows of jig saw ornament. The huge sign is mounted between the window bays and is supported by a combination of metal brackets and guywires.
